

## Tactical Pressure Inducing Device

### Abstract of the Disclosure

The present invention provides a device and method for providing pressure to  
5 certain areas of an individual's body in order to subdue and restrain that individual. The  
During the process of apprehending or subduing a person, the law officer can use the  
tapered end of the flashlight to apply pressure to a pressure point on the individual in a  
manner similar to the conventional method of applying pressure with the fingers. The  
present invention provides a tapered end shape to device such as flashlight or baton that  
10 can be used to apply pressure to a pressure point location of an individual for the purpose  
of restraining or subduing the individual.
